

Physical Development

We will be learning how to hold a pencil or pen with a comfortable grip. We will continue to use mark making tools to write our names, make books and create pictures.

When we are playing in the early years garden we will be playing group games such as duck, duck goose.

Understanding the World

We will use our senses to explore. We will touch and talk about the texture of different materials and use some of these to create a Bear Hunt story map.

We will talk about different kinds of houses and find out what they are called. We will look at the houses that are around us at nursery.

We will use our nursery camera to take photographs of our teddy bears.

Communication and Language

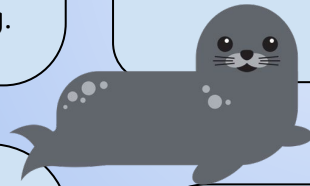

We will be developing our descriptive vocabulary as we read the story 'We're Going on a Bear Hunt'.

We will develop our conversation skills by taking turns to speak and listening to what others are saying.

Seals

Our Learning Journey

Spring 1

Personal, Social and Emotional

We will welcome our new friends to Seals nursery and help them to know about our routines.

We will begin to learn ways in which we can be calm when we are feeling sad or worried.

We will try to recognise how the other children are feeling.

We will continue to brush our teeth every day.

Mathematics

We will record numbers by making our own marks or writing numerals.

We will compare groups of objects and use the words 'more' and 'fewer' to describe the different amounts.

We will talk about the number that is on our home.

Literacy

We will be retelling the story 'We're Going on a bear Hunt'. We will act out the story, go on a bear hunt around the garden area and pretend to be the characters.

We will write invitations to our Teddy bears Picnic (date to follow).

We will learn to write some of the letters in our names.

Challenge me at home to...

Notice the number of my house and talk about where I live. Is it a flat, a bungalow or a house?
